

Please allow XM to continue to broadcast the traffic and weather in local markets as this is a valuable service to people who are traveling through one of the covered market. I recently traveled to Orlando on a vacation. rather than having to flip thru the local stations I had to go to one station. This is a great convience when planning the days activities. You can get the traffic and weather in just a few minutes. I pay for my XM service and I feel that XM should be allowed to broadcast any content that they want. The provide a great service, where else can you listen to the same channel across the entire country, And the breadth of programming is the real draw. In local radio they pick what you listen to, with XM I can choose what I want to listen to. Please reject petition 01-160. Thank you,
